Steward Call ◄

more infos...

Powered by **Akumendo** framework, our stand-alone **Steward Call** system can integrate **any** control system to provide easy and seamless yet much **more** efficient ways to call for fast service to your **Guests and Owner**...
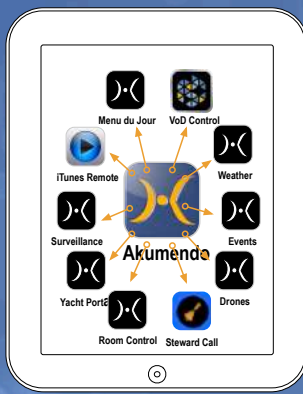

Our system is part of a wider **function** based set of stand-alone options to leverage **Crew and Staff** workflow...

- **Steward Calls can be sent from many user friendly options :**
  - ‣ a stand-alone app installed in any iPad, iPhone or Apple Watch
  - ‣ a custom button integrated within your control system (e.g. Crestron)
  - ‣ a physical button from third party luxury vendors (e.g. Ming)
  - ‣ or, ideally, from within our Akumendo framework User Interface…

- **Crew members are notified anywhere and can acknowledge calls :**
  - ‣ from any personal carry-on iPad, iPhone or Apple Watch
  - ‣ from wall mounted iPad or iPod Touch (e.g. in Pantries)
  - ‣ from handheld UHF through optional gateway (e.g. Motorola)

- **Guests and Owner can easily trace or cancel the call…**

- **Sound notifications are nice custom jingles telling call origin…**

- **All Steward Calls activity is logged and can be exported to spreadsheets, database, intranet webpage, and emails…**

- **Easy integration with other Akumendo sub-systems like our Gangway Video Door Bell, Crew Watchlist (MLC compliant), Crew Workflow Dynamic Signage, and more coming soon…**

Akumendo
